

MIT MAKWANA

AI Systems Engineer | AI Agents | Automation | RAG | Full-Stack Products | Niche Websites
Email: meetmakwana2004@gmail.com | Portfolio: mit-portfolio-nu.vercel.app

PROFESSIONAL SUMMARY

AI Systems Engineer focused on building AI agents, workflow automation, RAG knowledge systems, and production-ready full-stack applications. Builds business-facing systems that convert fragmented operations into scalable, intelligent workflows across healthcare, forecasting, CRM, and specialized digital products.

CORE CAPABILITIES

AI & ML: OpenAI, Anthropic, RAG, agents, embeddings, scikit-learn, PyTorch, TensorFlow, LSTM, Transformers	Backend & Data: FastAPI, Node.js, Supabase, PostgreSQL, MySQL, REST APIs
Frontend: React, Next.js, TypeScript, Tailwind CSS, responsive UI systems	Automation & Cloud: n8n, workflow orchestration, API integrations, Vercel, Railway, AWS-ready architecture

FEATURED AI SYSTEMS & CASE STUDIES

99 CARE | AI HealthTech CRM / Workflow Platform

- Designed an AI-first healthtech CRM concept focused on streamlined operations, structured dashboards, and workflow visibility.
- Positioned the system around automation, role-aware workflows, and operational decision-making rather than generic chatbot behavior.

StockCast | AI Stock Forecasting Dashboard

- Built an AI-powered forecasting system using LSTM and Transformer-based modeling concepts, with portfolio-reported 97%+ accuracy.
- Delivered real-time predictions through a clean web dashboard designed for fast interpretation and data-driven decision support.

Healthcare Diagnosis / Healthcare.AI | ML-Based Health Risk Prediction System

- Developed a healthcare risk-prediction application with patient data input, AI prediction, visualized metrics, personalized suggestions, admin dashboard, and PDF report generation.
- Used Python, Flask/Streamlit, scikit-learn, pandas, NumPy, and model comparison across Logistic Regression, Decision Trees, and KNN; reported approximately 92% accuracy.

PRODUCT & LEADERSHIP EXPERIENCE

Gujarati Global | Founder & CEO

- Led product positioning for a Gujarati diaspora/community platform covering discovery, local connections, events, restaurants, and community engagement.

SELF AI | Co-Founder & CTO

- Contributed to AI, automation, scalable infrastructure, and production-system thinking for a personal AI operating layer concept.

ADDITIONAL SYSTEMS BUILT

- Polaris: compact selected-work project suitable for demonstrating additional product breadth without diluting the top case studies.
- Niche Business Websites: high-converting websites for specialized businesses with modern UI, clear positioning, SEO-ready structure, and fast performance.

EDUCATION

Auro University, Surat | B.Sc. Information Technology

- Academic project work included machine-learning healthcare diagnosis/prediction systems, full-stack application development, and technical documentation.

Portfolio-ready focus: AI systems, automation, RAG, production software, and niche business websites.
